

Sheathing Technologies, Inc. introduces

## ULTRASOUND PROBE COVERS WITH DEBRIS SHIELD PROTECTION

Our exclusive latex free vaginal/rectal ultrasound probe covers with debris shield are designed to provide the ultimate protection against the transfer of infectious microorganisms and bodily fluids, providing a safer procedure for both clinician and patient.

- Introducing our **NEW 5" Debris shield**, offering almost triple the area of infectious control
- Also ideal for obese, menstruating and menopausal patients
- Bi-directionally rolled allowing for single-handed installation
