

SHEATHES HAS YOU COVERED!

COMPLETE BARRIER TO ALL KNOWN HUMAN PATHOGENS**
HPV, HIV, Herpes Virus, Hepatitis Virus, Parvovirus, Measles, MRSA, Cytomegalovirus

Sheathes3D™ Viral Barrier seamless contoured latex-free ultrasound probe covers are proven to provide a complete viral and bacterial barrier, helping to reduce the risk of infection.

Better yet, it's from Sheathing Technologies – a company you know that has you covered when it comes to quality. Go about your diagnostic imaging with confidence!

IT'S NOT THAT THEY'RE BAD, WE'RE JUST BETTER

Unlike conventional dipped latex or latex-free seamed probe covers, we have a unique manufacturing process for our Sheathes3D™ Viral Barrier seamless contoured latex-free ultrasound probe covers that provides the full protection everyone needs – down to 20 nanometers!

Sheathing Technologies is the only ultrasound probe cover manufacturer that is FDA-cleared to label our products as 'Viral Barrier'. Our testing shows that we block all bacteria and all currently known human viruses – versus our competitors, who do not.

Sheathes3D™ provides a barrier against even the smallest known human pathogens.** Sheathes3D™ also provides a viral barrier against HIV-1, HPV, Hepatitis, and all other known blood-borne and sexually transmitted diseases.*
