

The Choice is Yours.

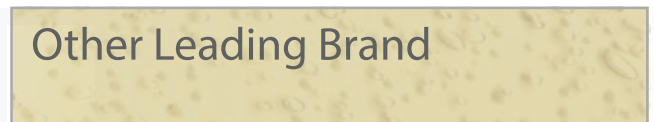

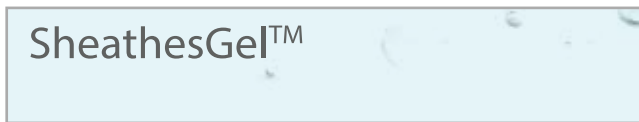

Look at your gel packet. Does it have this symbol? **STERILE R**
If it does, this means your product was sterilized with Gamma Radiation. Gamma Radiation is very **HARMFUL TO THE ENVIRONMENT**. In fact, this process creates about 300 years of **RADIOACTIVE WASTE**. The gel may also be **YELLOW-ISH** in color, have a **RUNNY** consistency, and **CONTAIN LOTS OF BUBBLES** - which creates artifacts in your image.

It's Time for a Change!

Sheathing Technologies is the only manufacturer with an **ENVIRONMENTALLY FRIENDLY** gel sterilization process. Our gel is sterilized using **HOT WATER** and has this symbol **STERILE!**. This means the only by-products of our process are air and water. This ensures that **NOTHING HARMFUL** is being released into our environment. Our gel is available in either a **CLEAR OR BLUE COLOR** for easy positioning. Radiation Sterilization is **NOT** your only choice!
