

SHEATHES HAS YOU COVERED!

COMPLETE VIRAL BARRIER TO ALL KNOWN HUMAN PATHOGENS*

HPV, HIV, Herpes Virus, Hepatitis Virus, Parvovirus, Measles, MRSA, Cytomegalovirus ...

WHAT IS A SHEATHES 3D™ VIRAL BARRIER?

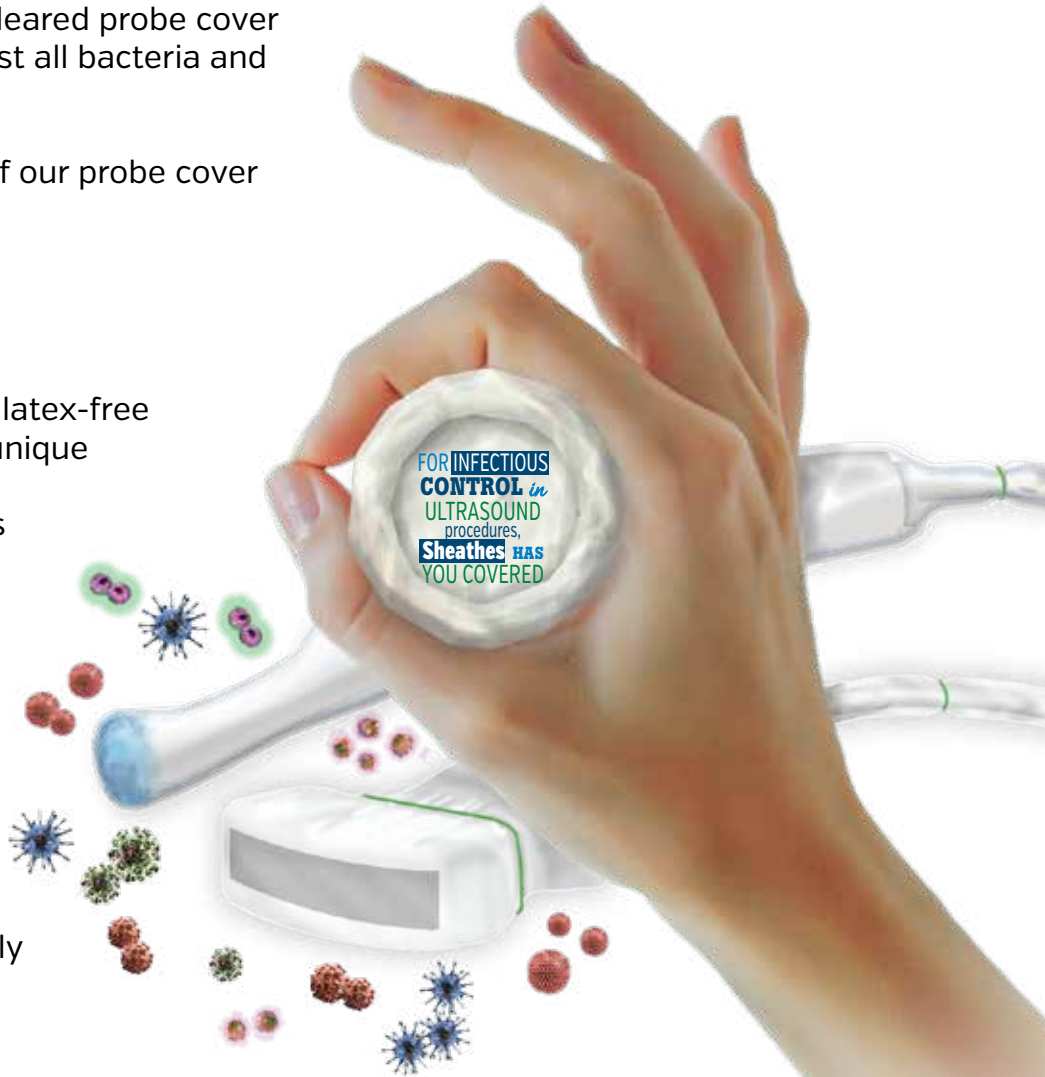

- It is a completely seamless FDA-Cleared probe cover which provides a total barrier against all bacteria and viruses down to 20nm.
- Only company to test every inch of our probe cover during Viral Barrier testing

IT'S NOT THAT THEY'RE BAD, WE'RE JUST BETTER

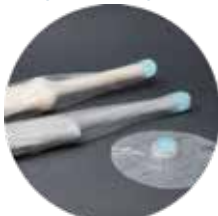

Unlike conventional dipped latex or latex-free seamed probe covers, we have an unique manufacturing process for our Sheathes3D™ Viral Barrier seamless conformal fit latex-free ultrasound probe covers that provides the full protection everyone needs - down to 20 nanometers!

Sheathing Technologies is the only ultrasound probe cover manufacturer that is FDA-Cleared to label our products as 'Viral Barrier'. Our testing shows that we block all bacteria and all currently known human viruses - versus our competitors, who do not.

Sheathes3D™ provides a barrier against even the smallest known human pathogens.* Sheathes3D™ also provides a viral barrier against HPV-1, HPV, Hepatitis, and all other known blood-borne and sexually transmitted diseases.*
