

Latex-Free Ultrasound Probe Covers Ob/Gyn, Fertility, and Urology

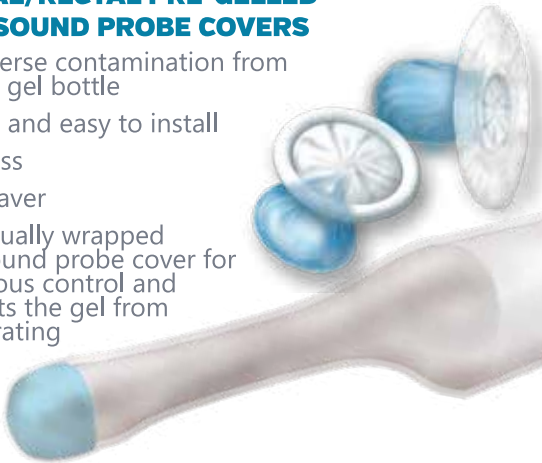

Now Available: The first and only FDA-cleared **VIRAL BARRIER** Ultrasound Probe Covers*

WHAT IS A SHEATHES 3D™ VIRAL BARRIER?

- It is a completely seamless FDA-Cleared probe cover which provides a total barrier against all bacteria and viruses down to 20nm.
- Only company to **test every inch** of our probe cover **during Viral Barrier testing**

VAGINAL/RECTAL PRE-GELLED ULTRASOUND PROBE COVERS

- No reverse contamination from shared gel bottle
- Simple and easy to install
- No mess
- Time saver
- Individually wrapped ultrasound probe cover for infectious control and protects the gel from evaporating

SEAMLESS ADHESIVE PATCH ULTRASOUND PROBE COVER

- Typical use for breast biopsies and abdominal procedures
- **No gel required** between the transducer and the probe cover
- No sticky remnants left on transducer
- No air bubbles or wrinkles
- Artifact and distortion free
- Quick and easy installation

VAGINAL/RECTAL EXTENDED FIELD ULTRASOUND PROBE COVER

- Custom-blended polyurethane ultrasound probe covers that eliminates the embryotoxicity, cytotoxicity and spermotoxicity of latex, and helps prevent sensitization and allergic reactions
- Designed for use during embryo transfer in IVF procedures
- Typical use for fertility clinics

VAGINAL/RECTAL ULTRASOUND PROBE COVER WITH DEBRIS SHIELD

- Designed to provide the ultimate protection against the transfer of infectious microorganisms and bodily fluids, providing a safer procedure for both clinician and patient
- Ideal for obese, menstruating and menopausal patients
- Bi-directionally rolled allowing for single-handed installation
- Protects transducer handle, cord and operator from infectious debris
- Adds 'elastic' grip retainer around probe/handle
- Can act as a 'pull tab' to aid in installation
- 3" and 5" debris shield available

ONE-STEP VAGINAL/RECTAL PRE-GELLED ULTRASOUND PROBE COVER

- Unrolled probe cover
- Easy installation
- Individually wrapped ultrasound probe cover for infectious control and protects the gel from evaporating
