

# Viral Barrier Adhesive Ultrasound Probe Covers

- **What is a Sheathes 3D™ Viral Barrier?** It is a completely seamless, FDA-Cleared probe cover which provides a total barrier against all bacteria and viruses down to 20nm
  - Only company to **test every inch** of our probe cover **during Viral Barrier\* testing**
- **No gel required** between transducer and probe cover
- No sticky remnants left on transducer
- No air bubbles or wrinkles
- Simplifies workflow
- Quick and easy installation and cleanup
- Artifact and distortion free

**These products do NOT require gel to be used between the transducer and the probe cover.**

**Easy, Fast, Clean, Safe and Latex-Free**
